Alebrije

Alebrijes in Mexican culture are fantastic creatures. It is a tradition to work with papier mache. Imagination and tradition have become a festival. Every November there is a carnival where more than 150 artists studios work for the alebrijes carnival. Robotics and giant sculptures bring together hundreds of thousands of people in Mexico City.

Technology offers new paths. The traditional and the modern come together with new materials. And new folding sculptures are possible. With new effects.

Mirror finish

Animal Print

Project animated textures onto the object.

The limit of creation is set by resources.
